

Refugee Resettlement Program

Refurbished Computer & Internet Fund

Having access to a computer and internet is vital in today's world. The ability to own a computer and access internet allows newly arrived refugees to apply for jobs, practice English, pay bills, and stay connected with friends and family. It also enables children to complete homework and online assignments.

Please consider contributing to our refurbished computer and internet fund to assist refugee families in accessing an affordable refurbished computer (\$50) and pay the cost of initial set-up and the first month of internet services (\$75).
